MAYOR'S OFFICE, Philadelphia, December, 1871.

T. ELLWOOD ZELL:

I take pleasure in recommending the use of Dr. JOSEPH FOULKE'S Friends' Almanac, published by you, *as the most accurate and trustworthy as regards the statistics, calendar, &c.*, and would add that this department has followed the rules laid down in your Almanac for many years regarding the sun and moon's rise and declination, tide, &c.

Very respectfully,

J. HENRY BULKLEY,
Police Clerk and High Constable Mayor's Office.

Explanations of Astronomical Characters.

THE PLANETS AND THEIR RELATIONS.

Lunar Cycle	17	Solar Cycle	11

Roman Indication 6

ECLIPSES.

In the year 1878 there will be two Eclipses of the Sun and two of the Moon.

I. An annular Eclipse of the Sun on the 2nd of Second Month, invisible in the United States.

II. A partial Eclipse of the Moon on the 17th of Second Month, in the morning, visible as follows:

	New York.		Philadelphia		Baltimore.		Cincinnati.	
	H.	M.	H.	M.	H.	M.	H.	M.
First contact with the Penumbra	3	45	3	40	3	34	3	3
First contact with the Shadow...	4	47	4	42	4	36	4	5
Middle of the Eclipse.....	6	15	6	10	6	4	5	33
Last contact with the Shadow ...	7	43	7	38	7	32	7	1
Last contact with the Penumbra	8	44	8	39	8	33	8	2

Digits Eclipsed $9\frac{3}{10}$, the first contact with the shadow, 82° from the northermost point of the Moon's limb towards the East.

III. A total Eclipse of the Sun on the 29th of Seventh Month, visible as a partial Eclipse at Philadelphia in the afternoon. Beginning 4h. 34m. Greatest obscuration 5h. 39m. End 6h. 18m. Digits Eclipsed 8 on the South limb.

IV. A partial Eclipse of the Moon on the 12th of Eighth Month. At Philadelphia the Moon will rise Eclipsed, the middle occuring at 7h. 7m. Last contact with the shadow 8h. 33m. Last contact with the Penumbra 9h. 53m. Digits Eclipsed $7\frac{8}{10}$. The first contact with the shadow occurs at 109° from the northernmost point of the Moon's limb toward the East.

Slate Mantels, all kinds of Roofing Materials, Paints, Oils, Leads, Glass, &c. Glines & Bartlett, 255 Market St. See p 7.

Address, **HENRY A. DREER, Philadelphia.**

A REPUTATION SECOND TO NONE.
See Advertisement, last page.

VENUS.

Venus will be Evening Star until the 20th of Second Month, then Morning Star until the 11th of Twelfth Month, after which it will be Evening Star the remainder of the year.

MERCURY.

Mercury will be brightest about the 31st of First Month, 2nd of Sixth Month, and 25th of Ninth Month, at which times it will likely be visible, being then in East just before sunrise. It will again be brightest about the 15th of Fourth Month, 9th of Eighth Month, and 9th of Twelfth Month, when it will be in the west immediately after sunset.

NOTES TO THE READER.

I. The astronomical calculations in this work are made to true clock time, the same as in the United States Almanac, the North American Almanac, and other standard works. The effects of Refraction, according to the latest improved Tables of Bessel, and the Equation of Time, have both been applied to the times of the Sun's rising and setting: so that the Almanac, and a good clock, will agree the year round.

II. A Time-piece may be set very nearly true by the rising, setting, or southing of the Sun, Moon or Stars,—but more accurrtely by the Sun (or the southing of the Sun, or a fixed Star), any where on or near the 40th degree of north latitude.

III. The time of the rising, setting, or southing of a fixed Star may be carried several days forward by subtracting, or backward by adding 4 minutes per day.

IV. The common day of 24 hours begins at midnight, and morning (marked morn.) continues from midnight till noon; and afternoon (marked aft.) continues from noon till midnight; this should be remembered carefully when looking for the times of rising, setting or southing of the Moon or Stars soon after midnight.

REGISTER'S LINIMENT for Man and Beast has no equal. See page 41.

Send for estimates for all kinds of Roofing Material, Oils, Leads, Glass, &c. Glines & Bartlett, 255 Market St. See p. 7.

COURTESY TO MEMBERS.
See Advertisement, last page.

RISING, SETTING AND SOUTHING OF THE PLANETS.

It should be observed that these are not sensibly affected by the longitude of a place. When the hour is less than six, it is in the morning; when greater than six, it is in the evening.

EARTHQUAKES.

An earthquake is a shaking, heaving, trembling, or concussive action of the solid crust of the earth. From the impossibility of obtaining direct observations, all attempts at explaining the cause of earthquakes must be only theoretical. All theorists agree as to the connection between earthquakes and volcanoes, and the cause of both these phenomena is attributed to the existence of a molten fluid mass in the centre of the earth. The generation of immense volumes of elastic gases under the influence of the heat of this mass, would necessarily result in an explosion, which would account for many of the earthquakes which occur. The latest theory is that of the brothers Rodgers, who state that the producing cause is an actual pulsation of the molten fluid mass in the interior of the earth. This pulsation is carried forward in the shape of great waves,

from large ruptures caused by the tension of elastic matter, bearing along, or floating, as it were, the rocky crust of the earth above. The structure of certain mountains confirms this theory in a very remarkable manner. The history and occurrence of earthquakes in by-gone ages is of great interest to the geologist. They seem to have occurred at all times, and to have altered the surface of the globe in all parts, forming new lakes and river-courses, and sweeping away old ones; changing hills into valleys, and raising ridges of mountains out of level plains. No part of the earth is free from them. They are, however, most prevalent in the neighborhood of volcanoes, and their frequency and violence seem to be connected with the intensity and activity of the volcanoes near them. Nearly all volcanic phenomena are accompanied by trembling and shaking of the earth near them. On many occasions they precede volcanic eruptions, and cease as soon as the eruption takes place.

It is singular, however, that many of the most severe earthquakes take place in regions far remote from volcanoes; and districts in which there are the remains of extinct volcanoes are not more liable to earthquakes than other places. Egypt has been more exempt, perhaps, than any other country; but an earthquake occurred there in A. D. 1740. They sometimes happen in the middle of the ocean; and cases have occurred where volcanic islands have been thrown up, and afterwards have disappeared. It has been calculated that not less than twelve or thirteen earthquakes, destroying both life and property, happen every year. When they occur severely, there is, first, a trembling; then a severe shock or a succession of shocks; then a trembling again, which gradually dies away. The most violent shocks are instantaneous, and there are seldom more than three or four. When there is more than one violent shock, there are smaller shocks or tremblings between. Whole cities

have been destroyed by an earthquake; and fertile districts, with all their fruits and produce, have been laid waste. It has been estimated that at least 13,000,000 of the human race have been destroyed by these convulsions. When an earthquake occurs, observers state that the shock has at first a distinct vertical direction, coming from below upwards, but afterwards the direction of the motion becomes gradually more horizontal, till it ceases. This motion is evidently caused by an earth-wave, or undulation of the solid crust of the earth. These waves must move very rapidly, often not lasting at any point more than a second of time. When earthquakes occur near the shore, the raising of the earth of course affects the sea, and immense tidal waves sweep over the land, often at a great distance from the shore, with irresistible fury. The earthquake which occurred in 1868 at the Sandwich Islands and along the west coast of South America, ranks among the most violent

C. W. PACKER'S

WORLD-
RENOWNED
PATENT

ICE CREAM FREEZERS.

REPORT ON AWARDS.

International Exhibition, Philadelphia, 1876.

"Having examined the product herein described, we respectfully recommend the same to the United States Centennial Commission for award, for the following reasons, viz:

1. Durability and excellent construction.
2. The simplicity and perfection of the mechanical arrangements by which cream, fruits, &c., are frozen.
3. The novel construction of the dasher or beater, having self-adjusting spring scraper and deflectors, producing (in the process of freezing) the smoothness and richness requisite in good Ice Cream.
4. The dashers are unaffected by chemical acids, and leave no metallic taste in the cream.
5. The facility with which the detachable-hinged cover is instantly removed, giving free access to the can.
6. Its adaption not only to family purposes, but for the use of Confectioners, Hotels, &c.

The superiority of the principles upon which the PACKER FREEZERS are constructed, and the popularity and success they have achieved during the many years they have been before the public, have earned for them the reputation of being the BEST ICE CREAM FREEZERS ever introduced. They are made in the most durable and substantial manner, avoiding all complicated machinery, and are not liable to get out of order; none but the best materials are used in their construction, all the castings are GALVANIZED, and the mechanical arrangements are such that they will freeze Cream, Fruits, or Water Ices in the shortest possible time.

CHAS. W. PACKER. Manufacturer,

20 North Fourth Street, Philadelphia.

Illustrated Circulars containing description, Price List, Receipts for Ice Cream and Water Ices, and directions for Freezing, will be mailed on application.

—THE—

Compound Oxygen

TREATMENT,

—FOR THE—

CURE OF CHRONIC DISEASES.

In this day of frauds and false pretensions, it is the part of common prudence to thoroughly scan the features of any new claimant to public confidence. The above named claimant is no exception: but since it comes bearing such credentials, as

Eight Years of Successful and Honorable Service,

And the Endorsement of such names as

T. S. ARTHUR, WM. D. KELLY, M. C. and E. C. KNIGHT,

it deserves to be looked upon with less suspicion than others.

A Brochure of 140 pages will be mailed free to any one asking for it; which contains the rationale of the action of Compound Oxygen, proofs of its marvelous results, the method of obtaining it, terms, &c. *Every Invalid should send for one.*

and destructive of which history has made record. In Peru, from Callao to Iquique, the whole coast was left in a complete state of desolation and ruin. Entire cities were destroyed. Immense tidal waves swept in upon the coast, dashing many vessels in pieces, and destroying much property and many lives. It has been estimated that 30,000 lives were lost in South America by this earthquake, and property destroyed to the amount of $300,000,000. In October of the same year a violent shock was experienced at San Francisco, California. Many buildings were injured, and some destroyed. Openings appeared in the ground in many places, from some of which issued hot air and water. It is a fact of repeated observation that earthquakes operate to raise the land masses, and thus oppose the destructive tendency of the aqueous agencies, which incessantly labor to wear away the continents, and reduce them to one common level. —*Zell's Encyclopedia.*

CORAL,

The name given to the stony frame secreted by many species of animals of the class *Polypi*. "The too common notion that coral is built by an insect, or that the coral animals build coral at will, as the bee builds comb, or as workmen masonry, is wholly erroneous. Coral is simply the frame-work or skeleton, or aggregate skeletons, of polyps —or, in some cases, of acalephs—and is a necessary result of their existence, and is entirely independent of the volition of the animals themselves. In fact, polyps form coral in a manner not different in kind from that in which the higher animals form bones, and the coral is wholly inside the polyps, and is in no sense a house, as is too commonly supposed, in which the latter live; and it is only when the polyps die, wither, and disappear, that we see the solid coral itself. From their resemblance to plants, the animals of this class were regarded by the early naturalists as

vegetable forms; and later they have been regarded as partaking of the nature of both plants and animals; but now their strictly animal character is established beyond any question. Still, they are often called *Zoophytes*, as well as polyps. The forms and hues exhibited by them are almost endless. Some parts of the tropical seas, where polyps especially flourish, rival in graceful and varied forms, and in beauty and splendor of colors, the most beautiful flower-gardens of the land. There is scarcely a form of vegetation, either trunk or branch, leaf or flower, fern, moss, lichen, or fungus, that is not imitated with striking exactness by these wonderful animals of the sea." As an ornament, black coral is much esteemed; but the red and the pink are also highly prized. Coral is found in very great abundance in the Red Sea, the Persian Gulf, and in the Mediterranean, on the coast of Sumatra, &c. It grows on rocks, and on any solid submarine

body, and it is necessary to its production that it should remain fixed to its place. Coral is an important branch of industry and commerce in Italy. Genoa, Leghorn, and Naples have been, from old times, the three great entrepots to which the raw material has been carried, and where skilful artificers have established themselves in order to work at its transformation. Coral is obtained in large quantities in the Mediterranean, and at considerable depths, of from 200 to 600 feet. Four varieties are distinguished: 1st, red, which is subdivided into deep crimson red, paler red, and vermilion, which is very rare; 2d, black; 3d, clear white; 4th, veiled white, which is the most common. — *Zell's Encyclopedia.*

tion of their name, are matters of some uncertainty; but the prevailing opinion is, that they were called either after a hermit Maro, who lived in the 5th century, or after their first patriarch, John Maro, who flourished two centuries later. The general opinion is, that the Maronites are sprung from the Monothelites, who arose in the 7th century, and held the opinion that Christ, though he united in himself the divine and human nature, had but one will. They were supported by several emperors, particularly Heraclius; but they were condemned and banished by Anastasius. In the country of Lebanon they became a warlike mountain people, and defended their freedom first against the Greeks, and subsequently against the Saracens. At length, in 1182, they renounced Monothelitism, and recognized the authority of the Roman Church. Nevertheless, although united with Rome, they are permitted to retain their distinctive na-

tional rites and usages. They administer communion in both kinds; they use the ancient Syriac language in their liturgy; their clergy, if married before ordination, are permitted to retain their wives; and they have many festivals and saints not recognized in the Roman calendar. In 1584, Pope Gregory XIII. founded at Rome a Maronite college, from which they have since received most of their priests. Their head is the patriarch of Antioch, whose residence, however, is the convent of Dair-al-Shafee, on Mount Lebanon. Every tenth year he has to give an account of the condition of the Church to the Pope at Rome. Subordinate to the patriarchs are bishops and several other orders of clergymen. In the district of Lebanon there were upwards of two hundred religious houses under the rule of St. Anthony; but in consequence of the recent war with the Druses, many of these have been destroyed. Their political constitution is that of a military common-

wealth; the supreme government being in the hands of four chief shieks, who are also their leaders in time of war. Their dependence on the Ottoman empire is little more than nominal, consisting merely in the payment of an annual tribute. In 1841, a fierce war raged between the Maronites and the neighboring Druses, in which the former suffered greatly. In 1860, the war again broke out with unprecedented fierceness, the Druses being aided and excited by the Mohammedan population, and even by Turkish troops. The Maronites were soon overpowered; about 160 towns and villages were destroyed, and nearly their entire territory laid waste. Many of the people were cruelly massacred. At length peace was concluded; and to prevent the return of similar atrocities, the European powers, at a conference held at Paris, agreed upon an intervention in Syria for the protection of the Christians. The number of Maronites is about 20,000.—*Zell's Encyclopedia.*

NUBECULÆ.

These are two very remarkable objects on the the southern heavens, long known to sailors as the Magellanic Clouds. They resemble in general appearance detached portions of the Milky Way, but on telescopic scrutiny are found to differ from the Milky Way in this, that whereas the galaxy shows few irresolvable nebulæ, the Nubeculæ exhibit great numbers of all orders of nebulæ. This is especially the case with the Nubeculæ Major, within which Sir John Herschel counted no less than two hundred and seventy-eight nebulæ, besides noting fifty or sixty outliers. He has pointed out that the existence of nebulæ of all orders, with stars from the ninth to lower orders, within a region which must be regarded as roughly spherical in form, should teach us to look with caution on the theory that nebulæ necessarily lie at inordinate distances beyond the fixed stars.—*Zell's Encyclopedia.*

WHANN'S

SUPER PHOSPHATE.

RAW BONE

Farmers who desire to raise large crops should by all means use this great fertilizer, which has won for itself a reputation unsurpassed by any other manure. Made from PURE RAW BONE (dissolved in Sulphuric Acid) GUANO AND SALTS OF POTASH AND SODA, it contains every element needed by growing plants.

On WHEAT, RYE, CORN, OATS, POTATOES, and all other crops it has given universal satisfaction. We refer to all who have used it.

We also continue to manufacture our well-known DIAMOND STATE GROUND BONE and BONE MEAL, guaranteed PURE no admixture of any kind. Also, our PURE, FRESH GUANO equal in ammonia to Peruvian, and at only two-thirds its cost. The analysis of the Phosphate is printed in each bag.

REGISTER'S LINIMENT

FOR EXTERNAL USE

FOR MAN AND BEAST

Has no Equal as a Curative.

Although only first offered to the public in the Fall of 1876, it has already a large sale in Italy, Europe, it having been introduced there through the Centennial. Its sale in this country is steadily increasing. It is sold as far West as Omaha, Nebraska, and as far South as Cedar Key, Fla., and wherever sold it gives the best satisfaction. **It is the Best External Remedy in existence for Man or Animals.** All it wants is a trial, it will prove itself. It is for sale by the Wholesale and Retail Druggists generally in Philadelphia, and any country merchant who has not got it on hand, will get it if requested. I caution persons not to be put off with something else. If not found on sale in some places, it will be sent in small quantities C. O. D. by Express.

This Liniment is a sure cure for

Rheumatism, Neuralgia, Head Ache,
Gout, Back Ache, or Lumbago,
Sciatica or Hip Disease,
Sores, Swellings,
Tumors, Itch,
Mumps,
Wounds, Injuries, Sprains,
Cuts, Burns, Corns,
Chilblains, Bunions,
White Swelling,
Tetter, Warts,
Skin Diseases,
Whitlows, or Felons,
Chapped Hands,
Tender Feet,
Varicose Veins,
Ingrowing Nails
Stings,
Bites of Insects,
Sore Throat or Quinsy,
Enlarged Tonsils,
Tooth Ache,
Pain in the Side,
Pimples, Wens, &c., &c.

A four-page Circular, giving directions, &c., is with each bottle. It is put up in two and four-ounce bottles, and retails at 25 and 50 cents.

Prepared by **FRANCIS REGISTER,**
Laboratory, 324 S. Fifth St.,
PHILADELPHIA.

THE PENN MUTUAL

LIFE INSURANCE COMPANY,

Office, No. 921 Chestnut Street,

PHILADELPHIA.

INCORPORATED 1847.

Dividends paid over $3,568,289.04

Losses paid over $3,462,691.79

Income for 1876, $1,650,000.

Cash Dividends Declared Annually.

Assets, $5,940,006.

PURELY MUTUAL.

The Penn is the only entirely Mutual Life Company chartered by the State of Pennsylvania.

Its surplus premiums are returned to its members EACH YEAR, thus furnishing them Insurance at the lowest possible cost.

All of its policies are non-forfeitable for their value after the third annual payment.

Particular attention is called to the Life-Rate Non-Forfeitable Endowment Policy, which, while giving protectien to the family of the insured in case of early death, also provides, at moderate rates of premium, a fund for future support, should old age be reached.

SAMUEL C. HUEY, President.

SAMUEL E. STOKES, Vice-Pres't. H. S. STEPHENS, 2d Vice-Pres't.
JAMES WEIR MASON, Actuary. HENRY AUSTIE, Secretary.
HENRY C. BROWN, Ass't Secretary.

AGENTS WANTED THROUGHOUT THE STATE,

With whom liberal arrangements will be made.

PROVIDENT

LIFE AND TRUST COMPANY,

OF PHILADELPHIA, PA.

INCORPORATED THIRD MO., 22, 1865.

Condition 12th Mo., 31, 1876, according to the Report of the Examiner of the Insurance Department of Pennsylvania:

Assets at Present Value,	-	$3,573,892.96
Liabilities, - - -		2,628,943.76
Surplus to Policy-Holders,	-	$944,949.20

The claims of the Company to public confidence and patronage, are based upon the superior longevity of its members, the care exercised in the investment of its funds, and the strict economy of its management.

The mortality experience of the Company from the date of its organization has been an average of less than seven-tenths of one per cent.

PRESIDENT,
SAMUEL R. SHIPLEY.

VICE-PRESIDENT,
WM. C. LONGSTRETH.

ACTUARY,
ROWLAND PARRY.

☞ **Agents Wanted. An easy Company to solicit for.**

Office, 108 South Fourth Street.
